GCI LIBERTY REPORTS

SECOND QUARTER 2020 FINANCIAL RESULTS

Englewood, Colorado, August 10, 2020 - GCI Liberty, Inc. ("GCI Liberty") (Nasdaq: GLIBA, GLIBP) today reported second quarter 2020 results. Headlines include⁽¹⁾:

- Announced proposed combination with Liberty Broadband Corporation on August 6th
 - Stock-for-stock merger expected to close in first half of 2021, subject to potential COVID-19 related delays
- GCI⁽²⁾ revenue increased 5% compared to the second quarter of 2019
 - GCI Consumer revenue up 5%
 - GCI Business revenue up 6%
- GCI operating income increased \$22 million and Adjusted OIBDA⁽³⁾ up 18%
- Liquidity as of June 30th
 - \$552 million of cash and cash equivalents, including \$88 million at GCI
 - \$271 million undrawn capacity under the GCI senior credit facility

"GCI continued to make substantial financial and operational progress during the quarter," said GCI CEO, Ron Duncan. "Despite the challenges of serving our customers in the midst of a pandemic, we added 3,700 consumer cable modem customers during the quarter. Our consumers responded to 5G service, faster speeds and improved coverage from our wireless network upgrades and we added 3,500 new consumer wireless subscribers sequentially. These gains played an important role in our strong Adjusted OIBDA growth for the quarter."

Corporate Update

On August 6, 2020, GCI Liberty and Liberty Broadband announced that they have entered into a definitive merger agreement under which Liberty Broadband has agreed to acquire GCI Liberty in a stock-for-stock merger (the

“Combination”). Additional information regarding the Combination can be found in the press release and presentation issued by GCI Liberty on August 6, 2020 which are available at ir.gciliberty.com/index.php/news-releases and www.gciliberty.com/events, respectively.

Note on COVID-19

GCI Liberty continues to monitor and assess the effects of the COVID-19 pandemic on its operations, wholly-owned businesses and various investments. COVID-19 has not had a material impact on GCI Liberty’s operating results in the second quarter.

GCI has seen a substantial increase in network traffic since early March, with utilization stabilizing at approximately 25% greater than pre-COVID-19 levels. The network continues to perform well despite higher levels of traffic. To assist Alaskans impacted by the COVID-19 pandemic, GCI launched several offers in March, providing free entry-level cable modem internet plans for new customers and free upgrades for existing customers through June 30, 2020. GCI worked directly with the Department of Education and Early Development and the Alaska Council of School Administrators to offer entry-level data plans with Wi-Fi equipment to K-12 students and teachers for free until June 30, 2020. GCI also participated in the Federal Communications Commission's ("FCC") Keep Americans Connected Pledge, pausing disconnects and waiving late fees for residential and small business customers impacted by COVID-19 and opening its Wi-Fi hotspots to any American in need of them. Additionally, the State of Alaska has restricted GCI from charging late fees to or disconnecting residential customers impacted by COVID-19 until November 15, 2020 or the end of the public health emergency. The following discussion includes the impact of GCI's COVID-19 related offers and programs on financial results and subscriber metrics.

GCI Liberty is in compliance with all debt covenants as of June 30, 2020. GCI's leverage, as defined in its credit agreement, was 4.2x, versus a maximum allowable leverage of 6.5x.

Discussion of Results

Unless otherwise noted, the following discussion compares financial information for the three months ended June 30, 2020 to financial information for the same period in 2019.

1.

- b) A revenue generating wireless line in service is defined as a wireless device with a monthly fee for services.
- c) A non-revenue generating wireless line in service is defined as a data-only line with no monthly fee for services.
- d) A revenue generating cable modem subscriber is defined by the purchase of cable modem service regardless of the level of service purchased. If one entity purchases multiple cable modem service access points, each access point is counted as a subscriber.
- e) A non-revenue generating cable modem subscriber is defined by the provision of basic cable modem service as a promotion to aid those impacted by COVID-19.
- f) A local access line in service is defined as a revenue generating circuit or channel connecting a customer to the public switched telephone network.

GCI revenue increased due to growth in consumer and business revenue. Operating income (loss) and Adjusted OIBDA improved meaningfully due to revenue growth and lower selling, general and administrative expense. Expense declined due to cost containment initiatives and lower health care costs as employees limited elective medical procedures due to COVID-19.

GCI Consumer

Consumer revenue grew in the second quarter with wireless and data revenue gains more than offsetting losses in video and voice. Wireless revenue growth was driven by higher plan revenue. Data revenue growth was due to higher subscriber counts. Wireless and data revenue generating subscriber counts also increased on a sequential basis. Video revenue declined due to a lower number of subscribers, partially offset by higher prices. Voice revenue decreased due to subscriber declines.

GCI Business

GCI Business revenue increased in the second quarter due to higher data and video revenue. Data revenue increased primarily from increases in the government, health and education businesses. Video revenue increased slightly due to higher political advertising revenue. Voice revenue declined slightly due to fewer subscribers. Wireless revenue declined due to lower backhaul revenue and grant revenue, partially offset by higher roaming.

Capital Expenditures

Year to date, GCI has spent \$62 million on capital expenditures, excluding capitalized interest and accrued capital expenditures from 2019. Capital expenditure spending was related primarily to improvements to the wireless and hybrid fiber coax networks.

Share Repurchases

GCI Liberty did not repurchase shares from May 1, 2020 through July 31, 2020. The total remaining repurchase authorization for GCI Liberty is approximately \$494 million.

The redemption date is the first business day following the twenty-first anniversary of the March 8, 2018 auto conversion. The preferred stock is considered a liability for GAAP purposes.
- (4) As defined in GCI's credit agreement.

GCI Liberty cash declined in the quarter as an increase in cash at GCI was more than offset by corporate expense. GCI cash increased as cash from operations more than offset capital expenditures. Both GCI Liberty and GCI debt were flat for the quarter.

Pursuant to an indemnification agreement, GCI Liberty will compensate Qurate Retail for any payments made in excess of the adjusted principal amount of the LI LLC Charter exchangeable debentures to any holder that exercises its exchange right on or before the put/call date of October 5, 2023. This indemnity is supported by a negative pledge in favor of Qurate Retail on the reference shares of Class A common stock of Charter held at GCI Liberty that underlie the LI LLC Charter exchangeable debentures. The indemnification obligation on GCI Liberty's balance sheet is valued based on the estimated

exchange feature in the LI LLC Charter exchangeable debentures. As of June 30, 2020, a holder of the LI LLC Charter exchangeable debentures does have the ability to exchange, and accordingly, the indemnification obligation has been classified as a current liability.

NON-GAAP FINANCIAL MEASURES

To provide investors with additional information regarding our financial results, this press release includes a presentation of Adjusted OIBDA, which is a non-GAAP financial measure, for GCI Liberty (and certain of its subsidiaries) and GCI Holdings together with a reconciliation to that entity or such businesses' operating income, as determined under GAAP. GCI Liberty defines Adjusted OIBDA as operating income (loss) plus depreciation and amortization, stock-based compensation, separately reported litigation settlements, insurance proceeds, restructuring, acquisition and other related costs and impairment charges. Further, this press release includes Adjusted OIBDA margin which is also a non-GAAP financial measure. GCI Liberty defines Adjusted OIBDA margin as Adjusted OIBDA divided by revenue.

GCI Liberty believes Adjusted OIBDA is an important indicator of the operational strength and performance of its businesses by identifying those items that are not directly a reflection of each business' performance or indicative of ongoing business trends. In addition, this measure allows management to view operating results and perform analytical comparisons and benchmarking between businesses and identify strategies to improve performance. Because Adjusted OIBDA is used as a measure of operating performance, GCI Liberty views operating income as the most directly comparable GAAP measure. Adjusted OIBDA is not meant to replace or supersede operating income or any other

GAAP measure, but rather to supplement such GAAP measures in order to present investors with the same information that GCI Liberty's management considers in assessing the results of operations and performance of its assets. Please see the attached schedules for applicable reconciliations.
